

THE MULE

Asphalt Solution 3

Travis introduces its newest solution for asphalt companies, "The Mule". The Mule is a dual-walled, smooth-sided aluminum Walking Floor Trailer, which horizontally discharges the product hauled using hydraulically-driven reciprocating slats on the floor.

10,850 POUND TRAILER; YIELDS UP TO A 29 TON PAYLOAD

KEITH V-FLOOR RECIPROCATING SLAT UNLOADING SYSTEM

STANDARD INSULATION

Features and Benefits:

- Lightweight, 10,850 lbs. as shown, complete!
- Approximately 3 tons lighter than a 42' belt trailer.
- Aerodynamic, smooth-sided, hollow wall construction.
- Walls have 2.5" hollow space for standard insulation.
- Compact 28' box, 76" wide, keeps load hot longer.
- Keith V-floor, Walking Floor provides for level unloading, eliminating the risk of tip-over compared to end dumps.
- 27.3 cubic yard capacity (as shown). Payload up to 29 tons.
- Travis' exclusive T-Lite suspensions increase legal capacity to 80,000 lbs. gross without the need for a 42' trailer (legal in at least 37 states).
- Pave everywhere: tunnels, over-passes, around corners, tight areas, etc.
- Stockpile, windrow, pave, or haul millings.
- Much tighter turning radius than a straight truck.
- Gain versatility of your power units with a detachable trailer, as opposed to a dedicated dump bed. You can still haul other types of trailers with your truck.
- **Eliminate expensive broken belts and trailer turnovers. Get the Mule, from Travis.**

THE MULE

Specifications:

- 28' length, aluminum body
- Frameless underbody design
- 60" sides (standard insulation)
- Double wall Wave extrusions
- 76" box – 27.3 cubic yards
- Air-operated, high lift gate, rubber sealed, power-up power-down
- LED lights mounted in gate
- Body overhang dumps deep into spreader, no external apron needed
- Solid flaps across rear
- Keith V-floor, walking floor unloading system, 6 slats (aluminum)
- Keith "Cleansweep" unloading tarp
- Hutchens H9700 4-spring tandem suspension
- (2) Travis T-Lite auxiliary lightweight liftable suspensions with 16" tires and aluminum wheels
- Michelin XOne XTE 455/55R22.5 wide base tires and Alcoa 22.5 x 14" aluminum wide base wheels
- Duralite hubs, X30 lightweight drums

Options Available:

Lengths, widths, side height, capacity, suspensions, tires, wheels, and tarps can be customized to fit your needs and application.
